Profile

Fresh Graduate Industrial Chemical Engineering Technology student at Universitas Diponegoro with strong interest in quality control, production processes, and research. Experienced in petrochemical production, laboratory quality control, and biomass-based renewable energy projects. Proven ability through internship at PT Lotte Chemical Titan Nusantara and multiple national/international essay competitions. Skilled in process monitoring, mass and energy balance, separation processes, and industrial safety. Detail-oriented, communicative, fast learner, and ready to contribute in professional industrial environment.

Education

Diponegoro University – *Semarang, Indonesia*
Industrial Chemical Engineering Technology
GPA: 3.73/4.00
August 2022 – July 2026
Industrial Management, Human Resource Management, Engineering Economics, Mass and Energy Balance, Chemical Industry Process, Separation Processes, Occupational Health and Safety, Petrochemical, Water and Wastewater Treatment, Fluid Mechanics, Chemical Engineering Project Management

Working Experiences

Process and Production Intern
PT Lotte Chemical Titan Nusantara – Cilegon, Indonesia
Sept 2025 – Oct 2025

- Assisted daily production activities in petrochemical processing units including operational monitoring and field operator coordination.
- Conducted equipment and process observations to ensure compliance with operational and safety procedures.
- Collected and prepared production samples for laboratory analysis to support quality control and process evaluation.
- Participated in shift discussions, plant walkthroughs, and troubleshooting activities related to production processes.
- Gained hands-on exposure to petrochemical production systems, process flow understanding, and industrial work culture.

Certification

- ISO 9001:2015 – Quality Management System (2026)
- ISO 14001:2015 – Environmental Management System (2026)
- ISO 45001:2018 – Occupational Health & Safety Management System (2026)

Organizational and Committee Experiences

Junior Staff of Economics and Business
Industrial Chemical Engineering Technology Student Association (HMTRKI)
June 2023 – Dec 2023

- Managed creative business initiatives including food and service sales to generate organizational revenue.
- Coordinated business operations throughout the organizational period to ensure consistent profit contribution.

Ministry Affair Staff
Christian Student Fellowship of Vocational School (PMK)
July 2024 – Dec 2024

- Developed and coordinated spiritual programs and activities to support members' faith and personal growth.
- Mentored and guided junior staff members in executing spiritual division tasks.
- Collaborated with cross-division teams to ensure smooth implementation of fellowship events.

Secretary and Treasurer - Entrepreneurship Webinar and PMW Committee
Industrial Chemical Engineering Technology (HMTRKI)
November 2023

- Prepared and managed administrative documents including proposals and accountability reports (LPJ).
- Managed committee finances including collecting funds, paying operational needs, and recording income and expenditure reports.
- Developed entrepreneurial knowledge and insight through direct involvement in the webinar program.
- Developed communication, problem-solving, and consensus-building skills through active committee involvement.

Fundraising Staff – Welcome Party and Retreat for New Members
Christian Student Fellowship of Vocational School (PMK)
August 2023

- Executed food and service-based fundraising initiatives to support event operational funding.
- Leveraged digital platforms to expand fundraising reach and maximize revenue generation.
- Coordinated with team members to ensure fundraising targets were achieved within event preparation timeline.

Competition And Achievement

3rd Place – Implementative Idea Category
Sustainable Innovations Essay Competition (SINEC)
August 2025

- Developed innovative bioavtur concept utilizing nyamplung fruit (*Calophyllum inophyllum*) as renewable and sustainable aviation fuel.
- Conducted idea development and research on biomass utilization and alternative energy for industrial sustainability.
- Collaborated with team members in preparing scientific papers, presentation materials, and competition submissions.

Abstract Selection Finalist – International Essay Competition
Explosion of Chemical Engineering Study Activities
May 2025

- Developed essay entitled "Optimizing Renewable Energy from Water Hyacinth Through Corncob-Enriched Biopellets for Indonesia's Industrial Clean Energy".
- Proposed innovative renewable energy solution using water hyacinth biomass combined with corncob-enriched biopellets.
- Conducted literature analysis and concept development on biomass conversion, renewable energy, and industrial sustainability.

Intellectual Property (HAKI)
Directorate General of Intellectual Property, Indonesian Ministry of Law and Human Rights

- Poster: Digital Symbiosis: Human-AI Collaboration for Sustainable Industrial and Workforce Management

Publication
Proximate Composition and Nutritional Characteristics of Analog Rice Produced from Cassava Flour, Corn Flour, and Tempeh Flour
Accepted for presentation / publication in International Proceeding (2026)

Skills and Interests

Technical: Visio, MatLab, Aspen Hysys, UniSim, Microsoft Office (Excel, Word, PowerPoint), Google Workspace (Docs, Sheets, Drive), Canva.
Soft Skills: Public Speaking, Teamwork and Collaboration, Communication, Critical Thinking, Creative Leadership, Problem Solving, Active Listening.
Language: Indonesian (native), English (Proficient – written and spoken), Javanese.
